

# 2017 Technical Luncheon

Monday, August 21, 2017

Join us on  
Monday, August 21<sup>st</sup>

New Orleans Downtown  
Marriott at the  
Convention Center

859 Convention Center Blvd.  
New Orleans, LA 70130

**11:00 a.m. Networking**  
**11:30 a.m. Luncheon**

**Presented by:**

**American Petroleum Institute Delta Chapter (API)**  
*“Delivering the next-generation of economically resilient deep water projects”*

*Production from Shell’s global deep-water operations is expected to reach approximately 900,000 boe/d by 2020, with new production primarily coming from established heartlands like the Gulf of Mexico. To achieve this, Shell is thinking radically different around how to competitively optimize production from existing infrastructure through near field development and brownfield redevelopment opportunities. The Coulomb Phase Two project is an example of how Shell is delivering the next generation of economically resilient deep-water brownfield redevelopment projects through a sustained, unrelenting focus on reducing project development costs and timelines without compromising safety. This discussion will focus on how Shell competitively re-scoped Coulomb Phase Two to come up with a simple, cost effective design that improves the project’s competitiveness by taking advantage of existing oil and gas processing infrastructure to limit our offshore footprint and how Shell has closely collaborated with our Partners in Safety to efficiently manage the project’s development schedule. Coulomb Phase Two will extend the life of the Coulomb Field by more than a decade and underscores the long-term, competitive growth potential of the deep water Gulf of Mexico*

### **Key Note Speaker:**

**Sylvie Tran** has been working in the Oil & Gas industry for over 20 years. She is currently the Non-Operated Ventures Manager at Shell’s deep water business unit in the Gulf of Mexico. Prior to this role, Sylvie worked in various management and project management roles in New Orleans LA, Pittsburgh, PA and Calgary, Canada covering Shell’s deep water portfolio, shale developments, sour gas developments and coalbed methane exploration. Finally, before joining Shell in Canada (2004), Sylvie worked as a drilling engineer and rig supervisor with various oil and gas companies worldwide in Canada, Australia, France and Algeria.

Sylvie holds an MBA from Harvard Business School and a Bachelor in Mechanical Engineering from McGill University. Sylvie is passionate about community service and serves on several Boards, including the Board of the Metropolitan Human Services District, ARC of Greater New Orleans and Urban League of Louisiana.
